Spanawave Corporation Receives \$2.7M Contract for Next Generation Scalar Network Analyzers from U.S. Navy

ROSEVILLE, Calif., July 22, 2020 – Spanawave Corporation, a technology leader in Commercial off-the-shelf and Custom Test and Measurement Equipment, announced it received a \$2.7M contract for Next Generation Scalar Network Analyzers from the U.S. Navy. The new 8003 Scalar Network Analyzers ordered will replace the aging fleet of older generation 8003 units in the NAVAIR METCAL program in support of the U.S. Navy’s on-going missions worldwide.

“The improvements and new features of our new generation Scalar Network Analyzers are the product of close cooperation between our technical staff and the NAVY team. The updates we have implemented with this product line will keep NAVY’s investment in process and procedures developed around this model relevant for decades to come,” said Mesut Koch, President and CEO of Spanawave Corporation. “Our continued support is part of our commitment to developing and manufacturing relevant test and measurement equipment technologies to keep pace with our end users’ constantly evolving needs to meet new challenges. We are excited to be able to deliver innovation that matters to our service men and women in the field.”
