Product Obsolescence Notice

Feb. 21, 2013

Dear Valued Customer,

Giga-tronics appreciates and values its business relationship with you and we look forward to your continued interest in our products and services.

This letter is sent to advise you that Giga-tronics will discontinue manufacturing the "A" model GT-1000A Microwave Power Amplifier effective immediately. This product is being replaced with the new "B" model GT-1000B Microwave Power Amplifier. The standard GT-1000B has the same specifications as the GT-1000A, and is a drop-in replacement for it.

Giga-tronics strives to provide the highest levels of service and support to all our customers. Our intent is to provide service and support for the GT-1000A Microwave Power Amplifier, including at our option, providing replacement hardware.

Please note:

- The new GT-1000B Microwave Power Amplifier performance equals or exceeds the "A" model performance.
- The GT-1000B Microwave Power Amplifier includes a new Remote RF Off input and a new extended frequency range option.
- GT-1000B Option 06 now covers 100 MHz to 18 GHz.

To best serve you, all inquiries and requests should be directed through your normal sales channels and contacts.

Sincerely,
Leonard Dickstein
Marketing Manager
